## Versus Plaster Key VPK

### PRODUCT DESCRIPTION:

Versus Plaster Key is Universal water based bonding aid.

### USES:

- Versus Plaster Key has been designed specifically for use in the building industry to bond sand/cement plaster and Gypsum plaster to smooth surfaces.

### FEATURES:

- Improves non-structural bond of cement and Gypsum plasters.
- No more hacking and chipping of smooth surfaces.
- Bonding to sound PVA surfaces.
- Easy to use.
- Low VOC.

### APPLICATION DETAILS:

- Soffits and vertical surfaces - Coat the prepared surfaces with Versus Plaster Key after dust etc. has been removed and apply a scratch coat whilst the Versus Plaster Key is still wet. Allow the scratch coat to dry and then plaster in the usual manner.
- Where Gypsum based plaster is used apply the Versus Plaster Key to the prepared surface and plaster straight on to the wet Plaster Key finishing off in a single operation. Versus Plaster Key can be added to the plaster mix (10% of water content) to obtain a stronger bond Versus Plaster Key can be applied by brush or roller coverage  $\pm 10m^2$  per litre

### SURFACE PREPARATION:

- Surfaces should be free of loose particles, scaling of flaking materials. Wire brush and rinse the surface if necessary.

### DISCLAIMER

The above information is given in good faith but without warranty due to the fact that the methods of application, location and condition of the substrates being coated are beyond our control.
